-BY-NEWS AND HERALD COMPANY.

TERMS, IN ADVANCE;

WINNSBORO, S. C.

Wednesday, December 1, 1897. ______

FOUR BALES TO THE ACRE. We have read with a great deal of interest in the Yorkville Enquirer how Mr. E. D. Thompson, of Point, S. C., has made four bales of cotton to the acre. His experience is at least instructive to farmers in general in as much as the yield, as far as we know is ahead of any record made in the

In 1895, he fertilized this aere with 50 pounds of soluble guano and planted it in corn, and he made between 40 and 50 bushels. In 1896, he put 16 two-horse loads of lot scrapings, scattered broadcast, and 1,000 pounds of soluble guano, Charlotte acid and German kainet placed in drill. He then planted in King cotton, and made on the acre 846 pounds. The present year, the middle of March, Mr. Thompson put on this land, a heap of compost, the component parts of which are fully stated in his very accounts reproduced from the Enquirer.

One of the interesting points in Mr. Thompsou's account of how he made so much on one acre, is that he selected farmer can do this. It requires congained without trouble. Another interesting point in this very interesting experience is the value Mr. Thompson last working." We confess that we are somewhat at a loss to understand this, or Mr. Thompson's meaning. We have always been told by cotton planters that the surface roots of cotton plants produce the roots, and that "at the last working" it is dangerous to throw dirt around the plant, because it then causes it to make new roots at the expense of the fruit. It may be, however, that we misapprehend Mr. Thompson, and his "deep furrow at the last working" does not throw dirt around the plant. At all events, Mr. Thompson's experience is very instructive, and we invite our farmers attention to it.

DEMOCRATS MUST GO, OF COURSE.

The Commissioner of Pensions holds that every pension examining surgeon in the United States, irrespective of the amount of fees he receives, is beyond the pale of the civil service law and may be removed at the pleasure of the Commissioner.

· His position in the premises is based upon-judicial decisions. 'The Solicitor of the Treasury decided recently that such surgeons are not officers of the United States, and are not, therefore, entitled to offices in public buildings; and twelve years ago, in a case appealed from the circuit court of the district of Maine, the late Justice Miller, of the United States Supreme Court, decided that these surgeons were not Government officials; that they were simply agents to be hired and discharged at will by the Commissioner of Pensions; and the Commissioner holds that if these doctors are not Government officials they cannot possibly be entitled by law or ruling to the benefits of the civil service law as extended in ex-President Cleveland's omnibus order.

In view of this state of the case, the Commissioner says that he cannot go back on a Supreme Court decision and wi. not hesitate in removing the Democrats on all pension boards at once, appointing Bepublicans in their places. There are about 200 boards of three members each in the larger

These removals will, therefore, enable the Commissioner to appoint about 600 Republican doctors.

Of course, the Democrats must be removed. They might reject too many applicants. An excuse must be found, of some kind; and as it does not suit to invoke the civil service rules, they must be disregarded to suit the oc-

WE confess that we deeply sympathize with Governor Ellerbe. He has been very severely criticised in the Newbold matter, and in many instances we think that the critics have gone too far. We have never believed that the Governor has told dispensary constables that he would pardon them when convicted of crime or that he has harbored Newbold, as suggested by many. We think, however, that the Governor is right in making the denial, but it is premature for him to declare his platform for re-election. He still sticks to the dispensary with some modifications. He had better wait for developments. The system is dying a sure death, and even Governor Ellerbe can not save it. He may, with the aid of the General Assembly, prolong its life, but its ultimate death is sure and certain. It is idle to talk about the dispensary without the profit feature. The people are now complaining of the ever increasing taxes, and they will not consent to maintain the system by increasing taxes. It certainly can not be supported, without the profit feature, except by taxation, and the taxpayers will rebel. The Governor's term is only about half over. All fair minded people should suspend judgment in his administration until his record shall have been completed.

"Some people may think it is a very fine thing to be Governor"-Governor Ellerbe Yes, according to the Orangeburg Times and Democrat, the woods are full of such people. It says:

"THE GRANITE CITY."

Such will be, and justly ought to be, after Mr. J. E. Norment's story of the sessing beyond question the finest grade of granite in the world and that, too, in inexhaustible quantities, it is more than appropriate that the county seat of Fairfield should be called "the Granite City."

So interestingly and charminaly has it been told by Mr. Norment that we feel like reading his story over and over again. And yet when analyzed, it has nothing of fiction in it. It is simply the truth. An old town, it is true; but full of those enduring have observed, have given Newbold things which come only with age, and due credit for surrendering. This is along with ripened wisdom the old town has added to it the modern progressive elements, which the facts and demn a man before he has been tried. figures of Mr. Norment make us fully appreciate and know.

It is rich in historical data. Far more so than we are wont to think. how inseparable is Winnsboro and Fairfield County from the State.

Courier should be widely circulated. homicide possible. It contains matter that is valuable, and we shall have occasion to refer to it again. A county, which created Mount Zion Society, and in which its 800,000 tons of granite at one blast 800,000 tons of granite at one blast were raised, deserves to be known. The News and Courier is helping us to make it known.
